THE INSPIRA SKIN -PRIVATE LABEL MEDICAL GRADE SKINCARE DIFFERENCE

Inspira Skin offers a variety of highly reputable, results oriented medical-grade skincare products to help you build an effective at-home regimen brand, which alone can make a huge difference in the health of your patients' skin. It is also a key factor in maintaining the results of other treatments your patients may receive at our practice.

What is Medical Grade Skincare?

Medical grade products are specially formulated by dermatologists and leading skincare experts. These skincare products are manufactured in a FDA Regulated laboratory and cannot be obtained by patients on their own; they must purchase them from a doctors' office or experienced medical spa.

Why is Inspira Skin's Private Label Medical Grade Skincare better?

We offer Plant-Based, Medical-Grade Skincare solutions, which penetrate deeply into the living layers of the dermis, and are regulated by the FDA. When combined with cutting edge clinical procedures, a synergistic effect occurs, and results are enhanced compared to doing only one or the other.

How do I know which skincare products to purchase?

Your clients' daily skincare routine is a very important factor in overall skin condition. The Inspira Skin Private Label Skincare consultants work with you and your staff to identify which products would be best based on services offered as well as skin concerns of your patients.

Medical Grade Skincare Products

Cleansers:

Wide variety of facial cleansers to with or without active ingredients to help address: sensitive blemish prone, and skin brightening, anti-aging skin.

Toners:

Designed to cleanse the skin and shrink the appearance of pores, usually used on the face. It also moisturizes, protects and refreshes the skin.

Serums:

Our serums are designed to deliver high concentrations of active ingredients to the skin. The serums are gel-based or liquid, and are less thick than a moisturizer. They're typically applied before moisturizers to help lock in moisture.

Moisturizers:

Our Moisturizing Creams renews skin's barrier to protect from environment, balance the skin's pH levels and help enhance a vibrant radiance from within.

Face Masks:

Face masks can be an effective way to deliver an intensive burst of nourishing and therapeutic skin care ingredients in a highly concentrated form. This gives the ingredients more time to penetrate the surface of the skin and take effect.

Body Care:

Our Body Care formulations focus on scar revision, cellulite reduction, firming of skin laxity, and hydrating the skin while balancing the pH and reducing inflammation.

SPFs:

Inspira Skin's medical grade SPF/sunscreen formulations contain molecules that help block the sun's harmful UVA/UVB rays to prevent photodamage & aging skin.
