 - Anti-Aging

BLEMISH CONTROL

BPO ZAP STICK

Blemish Control

The BPO Spot Treatment is a treatment that minimizes the appearance of blemishes. This lightweight formula contains Salicylic Acid and Tea Tree Oil to promote clearer, healthier, and radiant glowing skin. The Benzoyl Peroxide and Salicylic Acid penetrate sebum-filled and congested follicles, cleaning out clogged inflamed pores resulting in improved acne prone skin.

Key Active Ingredients:

- **Benzoyl Peroxide 2.5%:** Removes excess oil and dead skin cells, benzoyl peroxide helps kill acne-causing bacteria beneath the skin.
- **Salicylic Acid:** Cleans excess oil from pores, exfoliates dead skin cells, weakens acne bacteria, prevents future acne, and soothes inflammation
- **Resveratrol:** Helps protect skin's surface, interrupts and helps rebuff negative environmental influences, and brightens a tired-looking complexion. minimizes the look of redness.
- **Oligopeptide-10:** Kills p. acne, and reduces the appearance of blemishes and red blotchy spots.
- **Arnica:** Addresses redness, bruising, and inflammation. Arnica works wonders with acne, even in very difficult, cystic (hormonal) cases.
- **Cucumis Sativus (Cucumber) Fruit Extract:** High in minerals, potassium, and sulfur which help soften and hydrate the skin. has Anti-acne benefits and decreases skin sebum content, while decreasing trans epidermal water loss (TEWL).
